18V ONE+™ Caulking Gun

The RYOBI® 18V ONE+ Caulking Gun is ideal for applying sealants, fillers and adhesives to any DIY project, bathroom suite or newly fitted windows. The Caulking Gun takes 310ml cartridges, meaning it can take most common sizes and provides the user with another solution with the ONE+ system. This model is more compact from front to back compared to the existing RYOBI caulking gun making it easier to handle and store.

Get The Perfect Finish Every Time

A rotatable cartridge frame allows you to pivot the cartridge holder when using the caulking gun when going around corners. This helps give you the perfect bead when sealing around difficult and awkward corners. Matching this with a variable speed dial, provides you fine control by deciding how fast or slow you want to apply your sealant or adhesives.

Pressure at the Click of a Trigger

The ONE+ Caulking Gun can deliver up to 225kg of push force at the press of a trigger, helping to apply high viscosity materials. This helps take away any fatigue or aching hands that you usually get from manual caulking guns.
